

StreamNotifierProvider

StreamNotifierProvider

- a provider that allows you to expose and listen to a StreamNotifier subclass
 - StreamNotifier is a variant of AsyncNotifier with a build function that creates a stream
 - In StreamNotifier, we can create methods that can generate a new state(AsyncValue)
 - StreamNotifier, like Notifier and AsyncNotifier, has a ref objects as a property
- Notifier type by modifier
 - StreamNotifier (no modifiers)
 - AutoDisposeStreamNotifier (autoDispose modifier)
 - FamilyStreamNotifier (family modifier)
 - AutoDisposeStreamNotifier (autoDispose.family modifier)
