

enum + single state class + copyWith

```
enum ActivityStatus {  
    initial,  
    loading,  
    success,  
    failure,  
}  
  
class ActivityState {  
    final ActivityStatus status,  
    final Activity activity,  
    final String error,  
    ...  
    ActivityState copyWith() {},  
}
```

```
loading  
state = state.copyWith(  
    status: ActivityStatus.loading,  
);
```

```
success  
state = state.copyWith(  
    status: ActivityStatus.success,  
    activity: activity,  
);
```

```
error  
state = state.copyWith(  
    status: ActivityStatus.failure,  
    error: e.toString(),  
);
```
