

class modifiers

multiple state classes

```
abstract class ActivityState {}
```

```
class ActivityInitial extends ActivityState {}
```

```
class ActivityLoading extends ActivityState {}
```

```
class ActivitySuccess extends ActivityState {  
    final Activity activity;  
    ActivitySuccess({required this.activity});  
}
```

```
class ActivityFailure extends ActivityState {  
    final String error;  
    ActivityFailure({required this.error});  
}
```

replace

replace

multiple state classes (sealed class)

```
sealed class ActivityState {}
```

```
class ActivityInitial extends ActivityState {}
```

```
class ActivityLoading extends ActivityState {}
```

```
class ActivitySuccess extends ActivityState {  
    final Activity activity;  
    ActivitySuccess({required this.activity});  
}
```

```
class ActivityFailure extends ActivityState {  
    final String error;  
    ActivityFailure({required this.error});  
}
```

replace

replace
